Performance Comfort Cushions

WHY SKWOOSH?

SKWOOSH™ combines patented TekPad® gel with engineered designs to create the best **Performance Comfort Products** in the world.

WHAT IS TekPad® TECHNOLOGY?

TekPad® is a lightweight, temperature stable and non-toxic polymeric composite used in applications where superior cushioning, comfort and pressure relief is required. A performance cushion or pad made with TekPad® offers maximum body immersion and contouring. The superior cushioning power of TekPad® allows SKWOOSH™ to engineer lightweight, low profile (thin) cushions or pads for performance applications where weight size and effectiveness are truly important.

WHY SKWOOSH™ FOR OUTDOOR PERFORMANCE?

TekPad® is temperature stable, so it remains soft and easily conforms to shape even after exposure to temperatures as low as -20°C or as high as 60°C . Cushioning devices made with TekPad® can be used without concern for thermal discomfort or performance even if they have been stored outdoors.

WHY IS SKWOOSH™ DESIGN SUPERIOR?

Each **SKWOOSH™** is engineered for a specific use or application. All materials are carefully chosen to enhance the performance characteristics of SKWOOSH™. Low friction top surfaces are used to reduce body abrasion and high friction surfaces to maximize energy transfer. SKWOOSH™ eliminates the need for gluing or taping by using a superior non-skid material to eliminate movement.

WHY IS SKWOOSH™ CONSTRUCTION SUPERIOR?

All **SKWOOSH™** products use welded construction to eliminate stitching and guarantee waterproof seams. Waterproof seams mean no wet or soggy cushions or pads. Combine welded construction with high tech fabrics and the result is durability and **NO MAINTENANCE**.

THE SKWOOSH™ GUARANTEE

SKWOOSH™ Performance Comfort products are made in the USA and are guaranteed for workmanship and materials-**period**.
